

Amendment to the Specification

Please amend paragraph [0031] of the currently pending application in accordance with the following amendment. Applicant hereby submits that the amendment to paragraph [0031] does not introduce any new matter and is fully supported by the Specification as originally filed.

[0031] The unlocking program 16 branches to a step 46 to detect whether the system administration program, such as a task manager program (hereinafter referred to as "the task manager program"), is running. If the task manager program is running then the unlocking program 16 terminates the task manager program. If the task manager program is not successfully terminated, the unlocking program 16 branches to a step 48 where the unlocking program 16 exits the program. If the task manager program was not running, or was successfully terminated, the unlocking program 16 branches to a step 50 to detect whether other application program(s) are operating that might interfere with the operation of the application program utilized for reading the content file 11. If the other application program(s) are detected, then the unlocking program 16 branches to a step 52 where a warning is provided to the user to terminate the use of the other application programs. If the other application program(s) is not terminated, the unlocking program 16 branches to a step

54 and exits the unlocking program 16.
